

CleanMyMac 3 (MacPaw) Coupon – 50% OFF

by

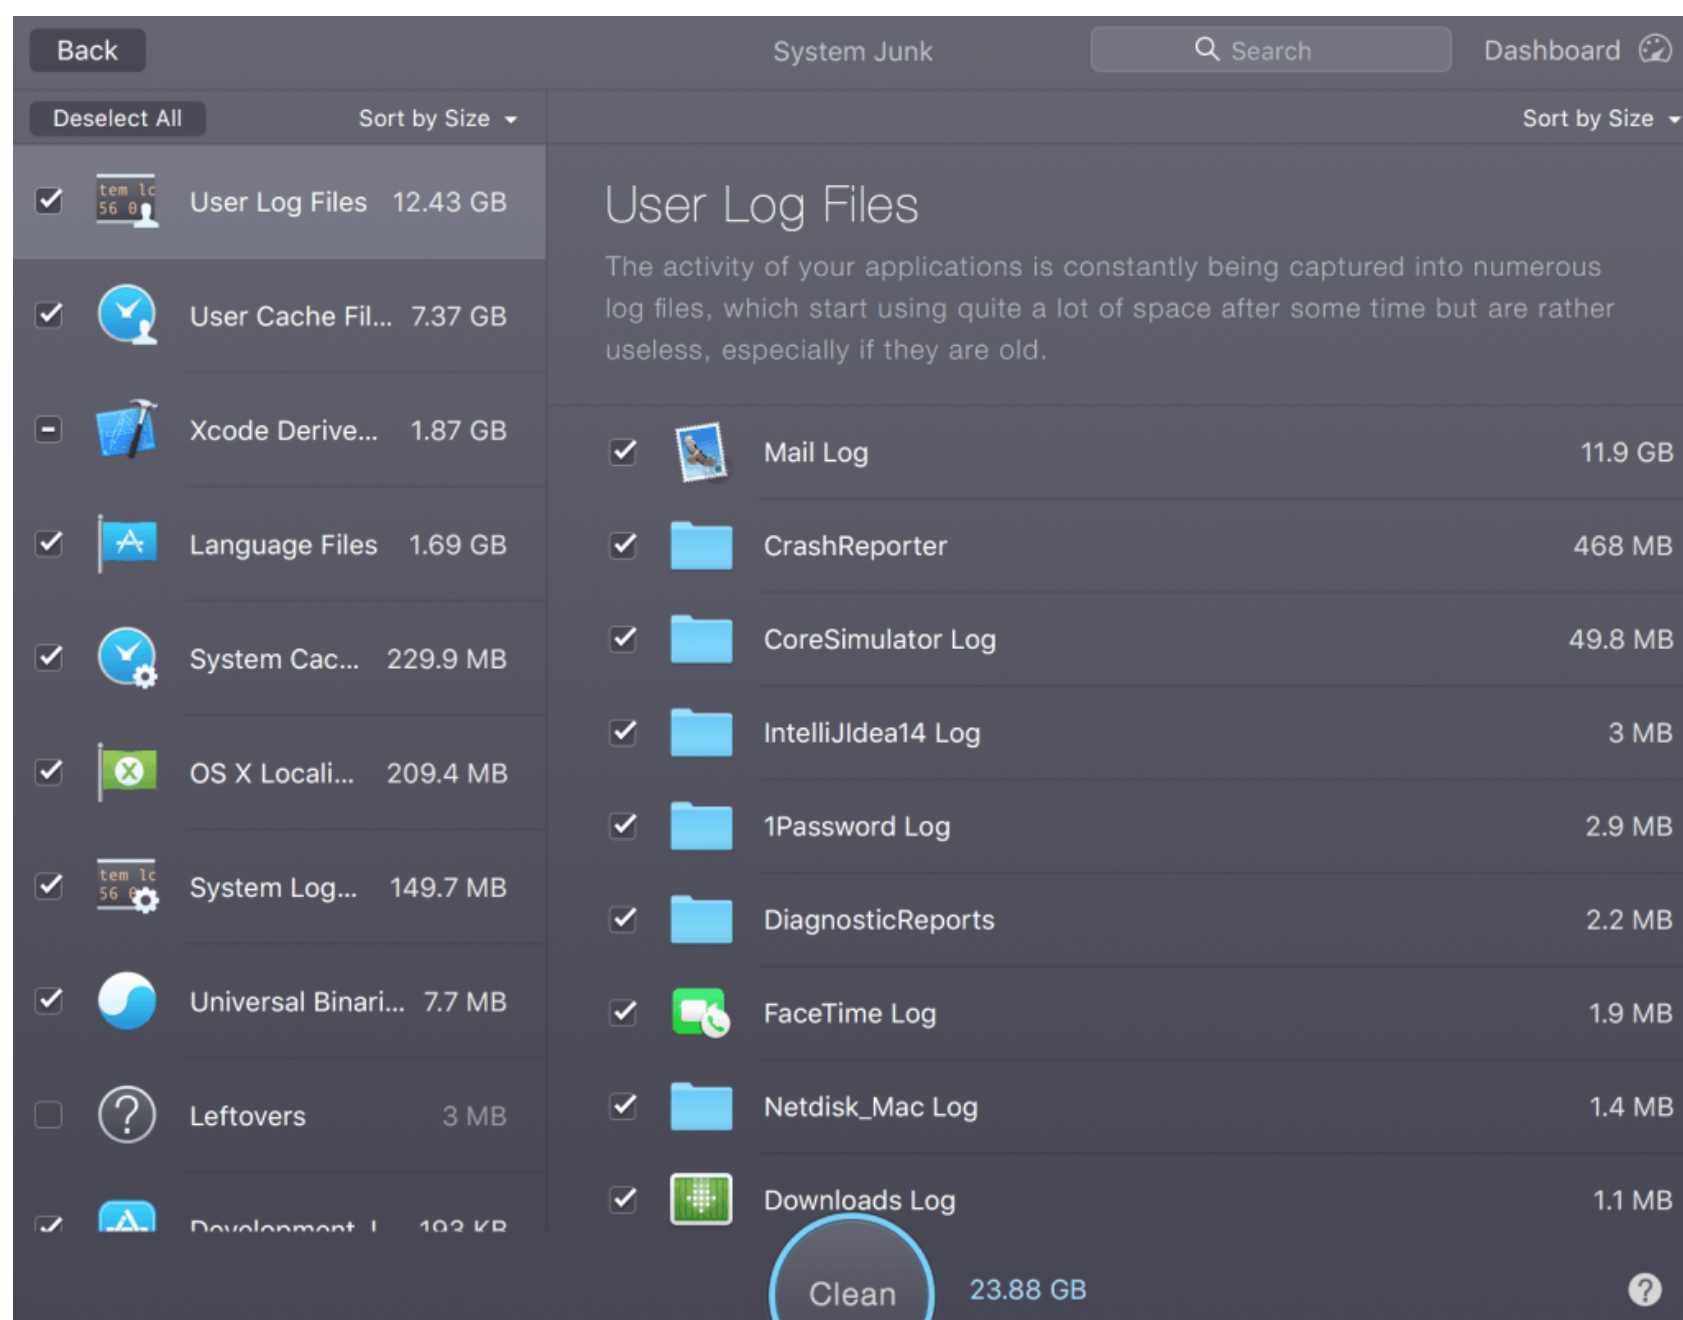

I've recently come across [MacPaw's CleanMyMac](#) app, it is absolutely amazing. I've always thought these kind of Mac Apps to be useless, and removing content from your Mac using some unknown app can be quite dangerous. But after I've encountered the problem where iCloud unknowingly took up a huge amount of space from my computer, as described in my [previous post](#), I only regret that I've not used CleanMyMac earlier. It is an awesome tool in identifying potentially useless content that takes up a huge amount of space.

I was shocked to find out that iPhoto stored 5GB of just rotated photos. You can definitely safely delete all the rotated photos, since you can get them back easily by rotating your current versions in iPhoto, no single information ever lost.

Cache files remembers your previous state in using that app. It helps in loading stuff faster. But as described in my previous post, an app can go

haywire sometimes and store a huge amount of useless data in Cache. CleanMyMac helps you identify the large Cache files fast.

So, how can you get a 50% OFF CleanMyMac coupon?

Discount details:

Quick Way:

1. If you own an .edu email address, follow this [LINK](#) to get 40% OFF straight away!

The same discount will apply to other Macpaw products – Gemini, Hider and CleanMyPC.

Otherwise, feel free to give it a try [HERE](#).
